\$1.50 per year

THE DAIRYMAN'S CALENDAR

As a progressive Dairyman desiring to secure maximum profits from my milk herd, I realize the necessity of adhering to an organized schedule of care, feeding and handling.

AVERAGE MILK PRODUCTION PER COW IN DIFFERENT COUNTRIES

Taking inventory, I have decided that pure milk is better than purified milk and that I want not more cows, but more and better milk from each cow.

Any cow in my herd suspected of being a boarder or otherwise lacking in necessary qualifications shall undergo a fair, but thorough test. What I spend on my herd must come back to me at a profit.

My first step should be the selection of a true type herd sire—a selection which should always command great care and good judgment.

During the hot months, whenever possible, I shall supply my herd with a cool, clean, outside resting place, where they may chew their cud in peace and ruminate on the blessings of being a provider rather than a parasite.

Proper selection of dams also will bring its own rewards in more milk, better milk and better animals.

A dirty condition like that pictured here shall never prevail in my herd. Rather than scrape, curry and brush endlessly, I shall clip and quickly clean thoroughly by wiping with a damp cloth.

The comfort of the animal is important. Thorough cleaning aided by periodical clipping about flanks, udders and underlines during stable months and all over the body when turning out in the spring shall be part of my program. Clean animal, clean milk with low bacteria count.

A clean barn, clean bedding, water at the stall and no milking within an hour of feeding are all part of the program which I shall enforce rigidly.

The growth in the number of cow testing associations convinces me that membership in one is a good thing. I pledge my association full support and co-operation.

The dairy or creamery that buys my milk must value quality and sanitation as much as I do. They must carry on from the point beyond which I have no control.

Proper feeding is essential. Therefore I shall always provide a carefully balanced ration to my herd, as well as a plentiful supply of pure, clean water.

Then when my milk is bottled I shall know I am repaid for my efforts. I shall get more milk and more money for my milk and the gospel of clean and better milk shall spread throughout the land.

CANADA'S NEW GOVERNOR-GENERAL ARRIVES

1.—Crayon sketch of Viscount Willington drawn on board Empress of Scotland just prior to the vessel sailing for Canada.
2.—Crayon sketch of Viscountess Willington drawn on board the Canadian Pacific liner Empress of Scotland just prior to the vessel's departure for Canada.
3.—Misty (inset) Cairn Terrier, belonging to their Excellencies which gained instant popularity.
4.—Menu card designed for use on Empress of Scotland when she carried the Governor-General to Canada, showing on a map of the world the various positions held all over by the Empire by Viscount Willington.
5.—Canadian Pacific Flagship Empress of Scotland which carried their Excellencies to Canada.

Their Excellencies Viscount and Viscountess Willington made many friends on their voyage from England to Quebec on board the Canadian Pacific flagship Empress of Scotland, when His Lordship came here in October to become Governor-General of the Dominion. They paid visits to all parts of the vessel chatting with new settlers for Canada and presiding at the various functions that take place aboard ship during an ocean voyage. Sharing their popularity was their Cairn Terrier, Misty, who was friends with everyone except perhaps a plump Chow who looked to him as though he might develop into a dangerous rival.

Canada's thirteenth Governor-General had a fine reception when the ship docked at Quebec. He struck a tactful note when he told his French-Canadian audience he too could claim descent from the Normans and that French blood flowed in his veins equally as in theirs. "In this country," he said, "the descendants of our two races have worked for many years under the British Crown for a common purpose and

object, namely, to promote the welfare and prosperity of the people of this wonderful country."

First impressions are vital in establishing successful relations and perhaps no impression gave so cordial an effect as one of His Lordship's speeches aboard the Empress of Scotland, which was broadcast all over Canada. In it he said: "I wonder if I may venture to add one word of rather an intimate and personal character. It is this—in wishing all my fellow-passengers the best of good luck in the future and all health and happiness they can possibly expect and obtain, may I ask them one and all to give an occasional thought—a kindly thought—to one who is about to undertake very grave responsibilities for the British Empire in the great Dominion of Canada."

That is the true democratic note, sounded with modesty and feeling and sure of an unreserved response throughout the length and breadth of Canada.

Many Farmers Attend Power Farming Demonstration At Matsqui

The "power farming school" held in Matsqui yesterday, arranged by Mission Motors, Ltd., attracted a large crowd of keenly interested farmers. That the demonstrations were considered as really practical was evident by the expressed opinions of those present—as one man put it: "no one could listen to those talks and see those films without learning something."

Mr. Tresswell of the Ford Motor Co. of Canada, and Mr. Cecil Lamb, B. Sc., late of the Dominion Dept. of Agriculture, P. E. I., proved themselves lecturers who not only had a sound knowledge of their subjects, but had also the ability to impart that knowledge to an audience in an interesting manner.

Power farming, soils, preparation of seed beds and conservation of soil moisture—all these agricultural problems were comprehensively dealt with. Instruction in care and operation of Ford tractors and cars was given by Mr. Gibbs, service manager of the Ford Motor company. This Ford expert pointed out that while the engine in the Ford tractor was much heavier and larger than that in Ford passenger cars it is exactly the same in mechanical principle and design. Such a feature simplified operation and repair, as the Ford engine was almost universally understood.

Mr. Ryan of the Oliver Plow company gave an interesting talk on field cultivation, using the Fordson equipped with Oliver implements. The practical demonstration was given by Mr. Matt. Anderson, an experienced farmer and associate of the Mission Motors, Ltd., who prepared a seed bed as near perfect as could be made.

In bringing such a useful demonstration into this district, Mission Motors are to be congratulated upon their initiative, for, although advertising their line, they are at the same time proving what can be done with the land from which our sustenance is obtained.

A large crowd of Brother Bills with their friends attended the Elks dance in Mission last night. Matsqui ferry was crowded.

Mr. Gus Nelson, a patient in the local hospital is reported to be improving.

J. Sullivan, provincial inspector of high schools, visited the Abbotsford school today.

Mrs. J. O. Trehewy and Mrs. Gray returned from Alaska this week, after an enjoyable trip.

A. S. MacDonald, who has been in charge of the C.P.R. station during M. Shore's absence, has gone to New Westminster.

A galvanized-iron awning has been built over the front of H. P. Knoll's furniture store.

A meeting of Abbotsford and District Board of Trade will be held in the hotel on Monday next.

Show starts 7 and 9 p.m. Admission 50c; Children 25c

Come and Hear Our New Organ

Councilor Shoots Large Brush Wolf

W. S. Hill-Tout shot a large brush wolf near his farm at Poplar a few days ago. The animal weighed over 60 pounds, and was marked similar to a coyote. Two wolves of a similar kind were killed by A. Nicholas of Clayburn recently.

Several deer have been seen lately in the Poplar-Pearsonville district, but we have heard of none being shot in that vicinity this year.

Hauling Lumber For Hotel Scaffolds

Contractors Emery and Wilson are again progressing with their job of excavating foundations for the new hotel. Work was brought almost to a standstill for a while last week because of the rains, but the work is now going ahead fast. Teams are used to scrape out the excavations, aided by shovel men. The earth is then drawn up an elevated platform and dumped into trucks run underneath. This soil is being used to good advantage for fillings on lots and grades in various parts of the town where it is dumped. Teams are now hauling lumber for scaffolding and framework.

Sumas Prairie Hay Goes East; Wheat Starts Rolling West

Large quantities of hay are being shipped from the reclaimed lands on Sumas Prairie to Alberta and southwestern B. C. points.

Wheat has commenced rolling west, the C.P.R. handling about ten trains of grain a day.

V. D. Sibley, Abbotsford spring man, is building a van body for a Chevrolet truck on order of a Mission customer. This is the fifth he has made recently.

Mrs. S. M. Green returned home from New Westminster Sunday.

The Girls Club were pleasantly entertained at the home of Miss Laura McKinnon on Tuesday afternoon. Annual thankoffering meeting of W. M. S. of the United Church will be held in the church on Monday evening at 7.30. Mrs. Young, a returned missionary from India is to make an address, and she will place on exhibition some curios gathered during her work in India.

"is good tea"

Over 30 years a standard wherever good tea is liked.

What Trade Treaties Mean To Canada

The tumult and the shouting is over, the ballots have been cast and counted, and the standing of the two major political parties in the House of Commons has been reversed. Whereas in the last short-lived Parliament the Conservatives held 116 seats and constituted the largest group, in the new Parliament, Liberals have, at the time of writing, 118 seats and are the largest group. In addition there are 11 Liberal-Progressives elected pledged to support a Liberal Administration.

In other words, in the new Parliament, unlike the old, there is a clear majority of members returned in support of one particular leader and who accepted nomination at the hands of conventions of the Liberal party. That is, the complexion of the new House of Commons makes possible a more stable form of government than existed in the last two Parliaments.

Then, over and above, the clear-cut majority of the Liberal and Liberal-Progressives united in support of a Liberal Administration, numerous Progressives, Independents, Labor and United Farmer members, practically all of whom represent Western constituencies, can be depended upon to give fairly consistent support to a Government pledged to the carrying out of Liberal policies.

Now that the battle is over, and the general verdict of the electors obtained, even those who would have preferred to see Mr. Meighen and his party victorious will find a degree of national gratification in the fact that the result has been fairly decisive and the stalemate, which has prevailed for so long to the disadvantage of the whole country, broken. It is what both of the major political parties desired and asked for, and what it has been demonstrated a majority of the constituencies wanted.

And now to business. Let everybody settle down to the task of assisting Canada to overcome such ground as may have been lost owing to the uncertainties of the situation in the past and grasp the splendid opportunities which are open to the Dominion.

In this column last week the view was expressed that whatever party was placed in power it should devote its energies to the further promotion of the policy of negotiating trade treaties with other countries, and particularly with all other sister nations within the Empire, and thus open to Canadian products and manufacturers larger and more profitable markets. We now desire to repeat and to emphasize that declaration. Since it was written a week ago, evidence has accumulated to demonstrate its wisdom.

On the day of the election a large display advertisement—not of political character—was inserted in Canadian papers by one of the largest automobile manufacturing concerns in the Dominion. It was headed: "The Millions Gained by Export are Millions Saved for You," and it went on to point out that it was owing to the rapid increase in its export business that reductions in price had been made possible in Canada, because of the enormously greater volume of production and consequent increase in efficiency and in lower production costs. It was not a tariff shutting out competition which had brought increased prosperity to this firm, but the opening of new and wider markets abroad through trade treaties, and leading to greater production, larger purchases of materials in Canada, and the employment of many hundreds more of Canadian workers.

More evidence of a similar nature is found in an article by the chairman of the British Columbia Division of the Canadian Manufacturers' Association who gives a long list of both direct and indirect benefits accruing to Canada from the recently negotiated treaty with Australia, and which he estimates means the gain of a \$70,000,000 market for this country. This Manufacturers' Association official makes a strong plea for a continuation of this policy of negotiating trade treaties, and, above all, that a stop be put to the making of a political football out of such matters.

It is right and proper that such treaties should be carefully examined and fully discussed by Parliament and the people of Canada, but when they have been approved and put into effect the efforts of petty politicians to try and create party capital against the Government of the day by seeking to arouse one set of people against the treaty because of some one particular item in it, and another set because of some other item, instead of viewing the treaty in all its nation-wide aspects, should be frowned upon and resolutely opposed.

Canada produces a surplus of nearly everything raised in this country. If Canada is to prosper and grow greater, and employment found for an ever increasing number of people, that surplus must be profitably disposed of in world markets. In order to obtain entry into those markets on the most advantageous terms, Canada must offer some concessions in return. That is only business, and the same principles must govern in international business as in private and domestic business relations.

Canada Is Looking For Wheat Honors

Saskatchewan Man Is Competing In Show At Chicago

In commenting on the announcement that J. C. Mitchell, of Dahnida, Saskatchewan, will compete this year for wheat-growing honors at Chicago, the New York Sun says:

Montana supplied to the world its champion wheat grower last year.

Important Scientific Discovery

Claim Nickel and Cobalt Benefits Cases of Diabetes

Professor Gabriel Bertrand, director of the biological chemical laboratory of the Pasteur Institute, Paris, is the authority for the announcement before the American Chemical Society that experiments with nickel and cobalt have produced encouraging results in the treatment of diabetes.

Experiments conducted by Prof. Bertrand and associates, he stated, first with nickel or cobalt alone and then with a mixture of the two have met with results sufficiently encouraging to cause continued experiments.

The biological expert stated that they have found cases of simple diabetes, excluding the consumptive type, could be benefited, sometimes to the extent of the complete suppression of the sugar output.

The two metals, the professor added, had been found present in the human body especially the pancreas gland.

Painful Sprains, Bruises, Restored By Nerviline

There is soothing power in Nerviline that has made it famous for nearly fifty years past. It sinks in deeply, it penetrates quickly, it takes away the pain from a sprain and brings grateful relief to bruised, aching muscles. If your joints are stiff and you are suffering from Rheumatism or Lumbago; if Neuralgia bothers you now and again, use trusty old "Nerviline." It works wonders, whether the pain is internal or external. Get a large 35-cent bottle from your dealer today.

Suits The Pension Office

Many War Widows In Britain Have Married Again

Nearly 10,000 British war widows have married again. They have the best wishes of the ministry of pensions, for it means a large cut in the war pensions bill.

In certain textile towns in England there are as many as seven women to every man. And yet the widows marry again! Most of them have shown a decided preference for bachelors. Out of 4,445 widows in London who married again within a single year, only 1,579 chose widowers.

WORK WORN PEOPLE

Find New Health By Improving Their Blood

If you feel run down, it means that your blood is thin and watery, that your vitality is low. You do not sleep well and are tired when you rise in the morning. You find no pleasure in your meals and are listless and dispirited at your work. You have no energy to enjoy yourself.

Thousands of men are run down by anxieties of work. Thousands of women are broken down by their household toil, with tired limbs and aching backs. Thousands of girls are pale, listless and without attraction. It all means the same thing—thin and watery blood, vitality run down, anaemia, poor appetite, palpitating heart, short breath.

Do not submit to this. Get new blood and with it new vitality. There is no difficulty in doing this. Dr. Williams' Pink Pills build up and enrich the blood, which brings with it new health and vitality. The man, woman or girl who takes Dr. Williams' Pink Pills is never run down. Their friends notice how energetic they are, what a fine appetite they have and how much they enjoy life.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wins Blind Championship

An unusual golf match was played at Toronto recently when Harris Trnner, of Saskatoon, and A. Archibald, of Victoria, B.C., who were among the blind soldier and sailor veterans of the Great War as the guests of the Canadian National Institute for the Blind, teed off at the Thornhill club for what was termed the "blind championship of Canada." Nine holes were played, and Mr. Turner won with a score of 84 against his opponent's 87.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

People who have good sense in most other particulars, sometimes really believe that all their friends are fond of them.

Many a man would talk less about justice if there were a remote possibility of his getting it.

After Shaving.
Rub the face with Minard's mixed with sweet oil. Very soothing to the skin.

MINARD'S "KING OF PAIN" LINIMENT

HARD PIMPLES ALL OVER FACE

Lasted Three Years. Healed by Cuticura.

"My trouble began with pimples breaking out all over my face. They were hard, large and red, and festered and scaled over. The pimples used to burn, causing me to scratch, and my face looked so badly that I was ashamed to go anywhere. The trouble lasted three years."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more and I was healed after using three cakes of Cuticura Soap and four boxes of Cuticura Ointment."

(Signed) Miss Reta F. Warren, Diligent River, Nova Scotia.

Rely on Cuticura Soap, Ointment and Talcum to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Brimshaw, Ltd., Montreal." Price: Soap 25c, Ointment 35c and 50c, Talcum 25c.

Boxed Cuticura Shaving Stick 25c.

Hideous "Dragons" For New York Museum

Lizards Eight Feet Long Were Captured In Malay Archipelago

Two monstrous "dragons" arrived at New York on the Cunard liner Aquitania from the Island of Komodo in the Malay Archipelago.

The "dragons," great lizards eight feet long and weighing 200 pounds, were captured by Douglas Burden, a trustee of the American Museum of Natural History. The saurians' appearance is horrid in the extreme. They are as thick as a man's body and are entirely covered with close protective armor. They have short, stubby legs on which they are able to run faster than a man. They have red forked tongues and make a hissing noise like escaping steam. One of their peculiarly nasty qualities is that they are entirely carnivorous.

While the expedition to Komodo sought their capture, one of them leaped on the back of a horse and so injured the animal that it had to be shot.

The other demonstrated its prowess by consuming the hindquarters of a deer at a single meal.

The "dragons" are the only specimens of their kind in captivity. Their sole known habitat is Komodo, where Alan Cobham, British aviator, saw them from the cockpit of his plane as he flew over the Malay Archipelago.

Jumping Hare In London Zoo

Confined In Small Cage Cannot Exhibit Its Agility

A veritable "spring-heeled Jack" has arrived at the London Zoological Gardens in the form of a Cape jumping hare, the first of its kind exhibited in the menagerie since 1890.

The Cape jumping hare is found in South Africa, but it has jumped about so much that it has extended its range as far north as Mozambique and Angola.

With elongated hind legs like a jerboa, this "bounding bunny" has been known to jump 30 feet.

To equal this feat in ratio in size, a kangaroo would have to leap about 30 yards, though the familiar flea can bear both in a handicap of this kind!

The Zoo specimen has not much chance of exhibiting its agility, being confined in a comparatively small cage in the Rodent House.

Banana Was Once A Novelty

Has Only Become Popular In Last Sixty Years

The banana, of which the president of the British Fruit Trades' Association says Britain consumed last year 12,000,000 bunches of 10 dozen each, has attained its amazing popularity only in recent times. Sixty years ago the banana was such a novelty that one finds Mr. E. L. Blanchard, the Drury Lane dramatist, noting in his diary for July 7, 1864: "Strolled through Covent Garden, tasting bananas for the first time; a vegetable sausage, tasting something like a marrow flavored with pineapple."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food.

Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

For Faster Trains

Railroad trains will be able to compete with aeroplanes in speed when ballbearings are used on coaches, engineers believe. To make such high speed safe, the rails must be set in a solid roadbed and several miles of this track is to be built at Detroit for experimental purposes. The concrete will be 18 inches thick and 10 feet wide. Such construction would allow an enormous saving in final operating costs, it is said.

Invention Of Russian Scientist

New Method To Extract Many Products From Coal

From 500 tons of coal a Russian scientist would extract, by a new method which he has invented and which is being seriously considered in Great Britain, the following products:

2,000 gallons of gasoline.
6,500 gallons of kerosene.
3,000 gallons of lubricating oil.
12,000 pounds of paraffin wax.
20,000 pounds of phenol.
45,000 pounds of pitch.
12,000 pounds sulphate of ammonia.
12,000 pounds of sulphur.

And even after that he would have left 374 tons of smokeless fuel that would give a greater heat than coal. Dr. Paul Dvorkovitz, the inventor of this process, is said to have interested British financiers and engineers in the project.—New York World.

Achievement In Europe

Lady Astor Tells Americans They Should Rejoice

Americans should rejoice in Europe's post-war progress rather than "hold up their hands in horror at the present situation," Viscountess Astor, M.P., declared in New York.

The admission of Germany into the League of Nations, with "the world's greatest war only eight years over," she said, was an achievement of which Europe was proud, "no matter what you in America think."

In her address before the National and New York League of Women Voters, Lady Astor said that while "many thinking people" believe the United States has taken the wrong course in the matter of international debts, she was not "discouraged by national or international mistakes." Nations learn from their mistakes—at least some do," she said, "and there is no reason to be downhearted."

The First Air "Sleeper"

Was Operated Recently By Germans Between Berlin and London

London saw its first flying sleeping car recently when a German aeroplane arrived at Croydon from Berlin. It was the Albatross L-73, a twin-engine biplane capable of rushing almost silently through the night with four persons sleeping in luxurious berths in the cabin. The passengers' cabins have electric lights and running water and by day the berths can be converted into seats.

Dr. Ruth, of the Albatross company, designer of the plane, was aboard when she arrived in England.

Asthma is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvellous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Bridge Used By Shakespeare

Built At Stratford-on-Avon In Fourteenth Century

The town council of Stratford-on-Avon proves itself worthy of its sacred trust in deciding that Clopton Bridge, over which Shakespeare walked, shall not be pulled down.

The old bridge, with its fourteen small but beautiful arches, was built late in the fourteenth century by that Sir Hugh Clopton who also built the house in which Shakespeare afterwards lived, and which another member of his house destroyed later. There must have been another bridge long before it, and before that a ford, for it certainly represents a very ancient highway. Indeed, the Romans may have used it, for they are known by their coins to have lived not far away.

By Shakespeare's time it must have been well weathered, and we can imagine him lingering on it with Anne Hathaway, gazing on one of England's fairest scenes.

Grain Appeal Board

The growing importance of Edmonton as a grain centre is evidenced by the establishment of a grain appeal board. It will no longer be necessary to ship grain to Calgary for inspection, when exception is taken to grading given. Grades will be finally determined here and much delay and inconvenience avoided.

Arctic Specimens For Ottawa Museum

Thirty packing cases and bags of scientific specimens from the Canadian Arctic, including thousands of specimens from Baffin Island, have recently arrived at Ottawa for the National Museum.

A French tire company is building in Stoke-on-Trent, England, a factory that will employ nearly 10,000 people.

His Star Of Destiny

Premier Mussolini of Italy Thinks He Will Die a Natural Death

Premier Mussolini believes that the star of destiny protects him from assassins, and that he will die a natural death.

That is what he told Robert H. Davis, of the New York Sun, who was received by the premier after the recent attempt on his life. Mr. Davis says:

"I saw Mussolini in the every room at the Chigi Palace, from the windows of which he addressed an impassioned speech to the people after the third attempt on his life in the last ten months.

"You ask why I do not protect what I call my person from the assassins," he said. "There is no need. My star protects me as Italy is protected. I shall die a natural death. As I live now, there must be adventure, and I must be free to come and go among the people, always my people."

It Will Prevent Ulcerated Throat

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

New Markets For B.C. Timber

The province of British Columbia contains two-thirds of the merchantable saw-timber in Canada, says the natural resources intelligence service. Since the opening of the Panama Canal many new markets have been developed for Pacific Coast lumber. In fact, several enterprising companies ship Douglas fir and other valuable British Columbia woods by boat to the St. Lawrence River and there saw them up into lumber for distribution throughout the Eastern States and Canada.

Minard's Liniment for bruises

Has Enough Radio Sets

Japan's huge demand for radio sets has apparently been satisfied. There has been a sharp decline in the demand for radio sets from that country. Previously Japan was one of the largest importers of sets.

Beware of Constipation It Is The Cause of Many Ailments

—The Shaw Studio

Hamilton, Ont.—"For many years I have used Dr. Pierce's Pleasant Pellets, and always keep a bottle in the house for use when needed. I would not think of being without them. If I have a bilious attack or suffer from a bilious headache, I take the Pleasant Pellets, and they always relieve these spells. They are the mildest and the best laxative or cathartic that can be had. In fact, they are an excellent regulator of the stomach, liver and bowels. I always recommend them for constipation. There is nothing better."—Mrs. Elizabeth Anderson, 9 Margaret St. All druggists. 60 Pellets for 30c. Write Dr. Pierce's Clinic in Buffalo, N. Y., for free medical advice no matter what your ailment may be.

To Build Mills In Canada For The Manufacture Of Artificial Silk From Pulpwood

When we gaze on a great forest tree it is not easy to visualize it in terms of rich cloth and silken raiment. And yet man, not content with silk, cotton, wool, linen and a number of lesser sources of clothing material, now employs wood for the manufacture of the latest textiles—artificial silk, or rayon, as it is called by the trade. The basis of all artificial silk is cellulose, and cellulose is the principal constituent of wood.

As long ago as 1889, Count Hilaire de Chardonnet produced artificial silk commercially, but it has taken many years of incessant labor to bring the various processes to that stage of perfection which is essential to commercial success. That the industry has now become a great undertaking is shown by the fact that the world's production in tons has arisen from 7,500 in 1909 to an estimated 100,000 for this year.

The general principle underlying the manufacturing methods is the treatment of the cellulose with chemical reagents to give a gelatinous solution which can be forced through a number of minute nozzles into a bath of solution (or in one process into air). This solution causes the coagulation of the liquid emerging from the nozzles and thus creates the actual filaments of artificial silk, though the material has to pass through several other stages, varying with the process, before it finally emerges as that glistening transparent gossamer to which we are now so accustomed, but which would have amazed many a nineteenth century grandmother.

The possibilities for rayon manufacture in Canada, with her vast pulpwood areas, are enormous. The countries which were first to develop the industry, however, were not those which possessed much raw material, but those which already had the organization, the equipment and the markets for a big textile industry. Thus, shortly before the war, France, already predominant in the manufacture of natural silk, took the lead, followed by Switzerland. Now the big producers and exporters are the United States, Great Britain and the countries of Central Europe that are prominent in the natural silk trade.

For a good many years Canada has supplied much of the sulphite pulp used for that purpose in these countries. In 1922 the natural resources intelligence service of the Canadian department of the interior published a report drawing attention to the unusually favorable conditions for the development within the Dominion of artificial silk manufacturing in its entirety. The following year Court-Aults, Ltd., largest manufacturers in the United Kingdom, sent engineers to Canada to investigate these representations, with the result that a plant was established in Cornwall, Ontario, in 1924, at a cost of \$2,500,000.

This would appear to be but the preliminary of many others. Canadian Celanese, Ltd., capitalized at \$7,000,000, is now constructing a plant at Drummondville, Quebec, and the Howard Smith Paper Mills have formed a subsidiary company called the Canadian Cellulose Company, which will be operated at Cornwall, Ontario. A new concern, the Canadian Rayon Pulp Company, is erecting a \$2,000,000 rayon plant at New Westminster, B.C. The B.C. Pulp and Paper Company, formerly the Whalen Pulp and Paper Company, operating pulp mills in British Columbia, has been carrying on chemical research for some time in the utilization of hemlock for the production of cellulose and certain results and conclusions have been reached which, it is stated, may determine the company to proceed with installation of a new plant for the manufacture of this sort of pulp. Many other companies variously located from the Maritime Provinces to the Pacific Coast are also taking steps or considering means to enter this field which is so profitable, so large, and which Canadian resources, both of wood reserves and natural power supplies, are particularly adapted to support.

B.C. Whaling Fleet Active
During the past twelve years, 7,619 whales have been taken by the British Columbia whaling fleet. The largest yearly catch in the period was 1,198 and the lowest 187. There are now a number of plants established on Vancouver Island devoted to canning whale meat as well as utilizing bones, etc., in the manufacture of various by-products for which there is a considerable demand.

It isn't easy for a man to keep cool when it is up to him to choose between the frying pan and the fire.

W. N. U. 1647

Win Butter Prizes

Saskatchewan Buttermakers Are Successful At Toronto Exhibition

Saskatchewan buttermakers won many prizes at both the Canadian National Exhibition at Toronto and the Central Canada Exhibition at Ottawa. At both exhibitions the prizes were awarded on the group system and Saskatchewan buttermakers were near the top of the list in practically every class.

"Saskatchewan won 17 prizes, seven of which were firsts, at the Canadian National show, an accomplishment of which Saskatchewan buttermakers may justly feel proud," said P. E. Reed, provincial dairy commissioner, in commenting upon the success of the creameries of this province at the big eastern fairs, coming on the heels of the big winnings recently at Vancouver. The showing at Ottawa, where there were not nearly so many entries from this province, is also said to be very creditable.

Influenza In North

Taking Heavy Toll Among Natives Near Arctic Circle

Influenza is taking a heavy toll among the natives of Canadian and Alaskan territories bordering on the Arctic Ocean, according to Captain Karl Klenenberg, owner and master of the fur trading schooner Old Maid No. 2, which returned to Vancouver from a voyage as far as Victoriaville. In a sparsely settled district near Herschel, according to the captain, one hundred men and women had died when he was there in July, and at Coronation Gulf, there had been thirty-five deaths and many were seriously ill.

Although the captain said the fur catch in the western arctic last winter was not good, owing to the sufferings of the natives of influenza, he expected his fur cargo to be worth \$100,000. He plans to dispose of it on the Seattle Fur Exchange.

Strawberries In Saskatchewan

Grown In Commercial Quantities In the Nipawin District

Strawberry growing in commercial quantities north of latitude 53, is the proud accomplishment of the Nipawin district in Saskatchewan. The plant has been successfully grown there for the past 12 years, but owing to lack of transportation facilities until the autumn of 1924, when the Tuffnel-Prince Albert extension of the Canadian Pacific Railway was completed, it did not become a commercial industry.

In 1925 several thousand 25-quart cases were shipped, some of them finding their way as far as Winnipeg and Regina. This year the production is expected to be nearly double that of last season.

Maple Sugar Output

Unseasonable Weather Cuts Down Production This Year

Owing to the unseasonable weather during the tapping season, the production of maple syrup and sugar in Canada this year showed a decrease as compared with the figures for the previous year. The quantity of maple sugar produced in 1925 amounted to 7,137,303 pounds, valued at \$1,320,837, as contrasted with 10,496,262 pounds, worth \$1,847,672 in 1925. Maple syrup output totalled 1,746,570 gallons, valued at \$3,575,538, as against 1,673,093 gallons, valued at \$3,440,226 last year. The province of Quebec continues to produce over half of the total Dominion production of maple syrup and sugar.

Coal Production For June

The output of coal from Canadian mines for the month of June was 47 per cent, greater than the average for that month of the five previous years, the monthly report of the Dominion bureau of statistics announces. The figures were 1,387,040 tons in June as against 1,138,738 tons in May and an average of 944,942 tons for the month of June during the five preceding years.

Couldn't Fool Him

A woman was having difficulty in teaching her new Chinese servant how to receive calling cards. She went outside and entered her own card. The next day two women callers presented their cards. Comparing them with that of his mistress, the Chinaman replied, "Tickets no good. Can't come in."—The Outlook.

The one country in Europe that lies outside the pale of copyright is Jugoslavia.

Add Billion To Income

Products Of Farms Of Western Canada Add to National Wealth

In a recent dispatch to the Toronto Globe, W. L. Smith, special correspondent of The Globe, and a former editor of the Farmer's Sun, estimates that approximately \$1,000,000,000 will be added to Canada's income this year, directly and indirectly, from the products of the farms of Western Canada.

Last year's wheat crop was worth \$400,000,000 to the growers, and it put the west in the prosperity column. Mr. Smith believes it is a fair assumption that this year the return will not be less. "Western Canada is going into general farming more fully than in the past, and livestock, poultry, dairy products and vegetables will pile up the money returns at every point of handling. Altogether a round billion is in sight," states Mr. Smith.

The prospect is encouraging for the whole of Canada. Last year the field crops of the country were valued at \$1,112,691,000. The east this year will again increase materially the west's contribution to national wealth.

Will Pay Prizes

Alberta Department of Agriculture Will Grant Honorariums to Prize Winners

The usual honoraria for grand championships and first prizes won by Alberta exhibitors at the Chicago International Exhibition to be held the first week of next December, will be paid this year by the Alberta department of agriculture. The honorarium for a grand championship is \$150, and for a first prize is \$100, in the International Hay and Grain Show. The exhibits from Alberta for this show will be collected by the department at the government seed cleaning plant, and the department will pay the freight or express on these exhibits from Edmonton to Chicago and return, and will arrange to put the exhibits in place. The special prizes offered by the department are for threshed grains, grass seed, clover seeds, baled hay, alfalfa, corn on the cob, etc.

Desirable Trait in "Huskies"

One of Most Important is Learning to Halt On Command

In Alaska a good team of "huskies" now brings \$500 to \$700, depending upon their strength and the efficiency of their training. One of the most desirable traits in a dog used for team work is his training to halt immediately upon command. Prompt halting is necessary because the great danger of sled travel is the air holes in the ice. To teach them they are often allowed to plunge into an ice hold trap so that the chilly bath may be remembered.

Sleep

The average amount of "absolute rest" that is gotten during a night's sleep is only 11½ minutes according to Prof. H. M. Johnson, of the Mellon Institute at Pittsburgh. The remainder of the time he says there is usually muscular or mental action, such as take place during a dream. Seven and three-quarter hours of sleep is plenty for any normal man or woman, the scientist declares.—New York World.

Highlanders Present "Big Horn's" Head

This magnificent mounted head of a Rocky Mountain sheep was presented recently to Lt.-Colonel C. P. James, D.S.O., commanding the Argyll and Sutherland Highlanders at Parkhurst, Isle of Wight, by Colonel Sir George McLaren Brown, K.C.B., European general manager of the Canadian Pacific Railway. The head was sent forward from Banff by the 1st Battalion Calgary Highlanders, 10th Battalion C.E.F., in commemoration of the fact that they have become affiliated with the Argyll and Sutherland Highlanders. Sir George is an honorary

Planning For World's Poultry Congress

Many Nations Sending Delegates To Ottawa Next Summer

Sixteen foreign countries have already accepted invitations to send delegates to the world's poultry congress, to be held in Ottawa next summer, it was stated at a meeting of the congress preparatory committee at the Canadian National Exhibition.

Reports were received from committee members on different features of the congress and all reported progress in their work of arranging for the largest gathering of poultry authorities that has ever taken place in the Dominion.

The United States has agreed to send 1,000 automobiles to take part in the tour which is being arranged from United States border points to Ottawa and the American Poultry Association will stage one of the largest foreign exhibits to be presented at the congress.

Russia is sending a large delegation. Royalty will be represented at the show, the Prince of Wales having decided to exhibit.

Lord Willington, Canada's new governor-general, will be the chief patron of the congress.

Arrangements have been made to take a number of the foreign delegates on a tour of Canada from coast to coast.

Prefer Canadian Wheat

Purchasing Agent From Cuba Buys Canadian Goods

Canadian hard spring wheat is preferred to all other varieties in Cuba according to J. E. Gonzales, purchasing agent for the Government of Cuba, who was recently in Montreal buying Canadian goods for his country. The annual exports of Canada to Cuba total in value nearly \$9,000,000. When in Montreal, Mr. Gonzales arranged for the purchase of \$3,725,000 worth of potatoes for later delivery. He will also buy quantities of flour, hay, oats and other products.

It will be only a few years before the annual Cuban consumption of Canadian grain will assume much larger proportions, said Mr. Gonzales. A project was on foot to erect large flour mills at Havana, and when those were finished, the demand for Canadian hard wheat would be more than quadrupled.

Knew Them All

The Girl—Hello, Nellie speaking; who is this?

Voice on the Telephone—Ludwig, sweetheart.

Who? I can't understand you. Ludwig—L for Ludwig, U for Ulrich, D for Dietrich, W for William, I for Ignatz, G for George.

But, dearest, just which one of the six are you?—Fliegende Blätter, Munich.

Beer Consumption Lower In Germany
Germany, once known as a nation of beer and coffee drinkers, is turning to cocoa and chocolate. The high price of a stein of beer, the government reports, has cut the annual consumption from 102 liters for every man, woman and child to 75 liters. Coffee consumption has been cut in half, the average cost per pound being about one dollar.

Farming Is The Fundamental Source Of Canada's Wealth And Basis Of Our Prosperity

A Little Known Industry

Mining For Timber Has Become Important Business

Digging in the earth for minerals is no new thing, but it is not generally known that mining for timber has been carried on as an important and lucrative business. In a wide swamp near Chicago quantities of white oak logs are being recovered, the remains of a great forest that was submerged seven or eight thousand years ago. Although the outer layers of wood have decayed, some chemical agent in the soil has made the remainder hard and durable and given it a delicate color, for which it is much prized. Gold prospectors on the Charlotte Plains in Australia recently discovered in the bed of a river long since dried up, a valuable deposit of timber known as the she-oak. Many of the logs unearthed had the appearance of having been cut and trimmed by human agency. This wood is also noted for its toughness, and is employed in the manufacture of ornaments and toilet articles. In the peat bogs in Ireland deposits of bog-oak are frequently encountered. This substance is jet black and exceptionally hard, and provides a profitable industry for the inhabitants, who fashion it into ornaments, pipes, crosses, and so on.

Should Eat Little Meat

Drink More Milk and Add Eight Years to Life

By drinking more milk and eating less meat men could add eight years to the "part of his life worth most to himself and to the world." H. C. Sherman, professor of chemistry at Columbia university, stated in a recent address.

The adequate diet determined by recent research work in nutrition, he said, prescribes more milk and less meat to increase individual efficiency and vitality. The public health movement promises to augment the life span by eight years, and this increase could be doubled, Professor Sherman thinks, by a universal shift in diet.

Honey Yield In Alberta

Beekeeping Business Has Yielded Good Returns This Season

The beekeeping business of Alberta which is centred mainly in the irrigated district around Lethbridge and Stirling has brought good returns this season. In the locality, named the yield is estimated at more than a hundred tons from 3,000 colonies. Last year most of the local honey was wholesaled at 15 cents per pound. This year a price of better than 16 cents is being received despite the larger local crop. This is due to the fact that the Ontario crop of white honey is only 40 per cent. of last year's output in that province.

To Study Conditions

British Board of Trade Delegates to See Canada

Sir William Mackenzie, chairman of the board of trade delegation which is to make a study of industrial conditions on this continent, has arrived at Quebec from Liverpool, accompanied by F. W. Lofett, assistant secretary of labor, I. H. Mitchell, conciliation officer of the ministry of labor, and H. C. Emerson, who will act as secretary of the delegation. They will be several weeks on this continent, visiting numerous centres in Canada and the United States.

Hay Exports Vary

One of the most variable Canadian export products is hay, according to the natural resources intelligence service of the department of the interior. Exports of hay vary roughly between 50,000 and 500,000 tons annually, chiefly to the United States, Britain, France, Newfoundland and the West Indies. In the latter islands Canadian hay has to meet competition from sugar cane leaves which is used as a fodder and sold at very low prices.

Wrap Parcels In Silk

To "carry your package home" in Japan is the matter of course thing to do. If it is a "lady of high degree" she will produce from the capacious depths of her kimono sleeve a lovely time-softened old silken length that may have come direct from the Seven Thousand Gods of Japan or from Hon. Ancestors. It is considered ill-bred and common to a degree to carry a bare package through the streets.

Special beds, tables and chairs are now provided for tall men and women at a London hotel.

A tour through any good agricultural section of Canada in the fall of the year impresses one with the fact that the greatest and most inexhaustible source of Canada's wealth is in Canadian soil. The countryside is one great panoramic picture of grain crops, growing forage and livestock feeding contentedly on a thousand hillsides, meadows and pastures. The actual cash value of all this production exceeds two billion dollars annually, and strange as it may seem this huge mass of wealth is achieved without exhausting any natural resources or depleting any storehouse to which succeeding generations are rightful heirs.

Economists point with pride to the industrial skyline of Canadian cities, but there we find labor expended on what the farmer has already produced or on the raw material, the taking of which is exhausting our forests and our mines. For the year ended June 30, 1926, Canada exported farm products to the value of \$817,206,871, or over \$75,000,000 more than the total export trade of the Dominion ten years ago. Here is almost one billion dollars' worth of goods added to the wealth of Canada without depletion or exhaustion of any natural resource. It was taken from the soil, air and sunshine, just as future generations may take it in still greater volume if correct methods are practiced.

Everything possible and economically practicable should be done to encourage manufacturing and commerce, in order to maintain a proper economic balance within the nation. But the great basic industry in Canada is agriculture; farming is the fundamental source of wealth; the soil is the basis of our prosperity.—Farmer's Advocate.

Enough Apples For Everyone

One Barrel of Apples For Every Three Persons

In relation to population Canada and the United States will each produce this year one barrel of apples for about every three persons of the population. The commercial apple crop of Canada is placed at 3,000,000 barrels. The Dominion's population is 9,000,000 in round figures.

In the United States the apple crop is estimated at 40,000,000 barrels. In Ontario, Quebec, Nova Scotia and New Brunswick, the principal fruit growing districts of Eastern Canada, the apple crop this year is slightly lower than last year, but is 30 per cent. more in British Columbia than a year ago. The production in 1925 in British Columbia will total over 1,200,000 barrels. A considerable part of the Canadian apple crop is exported to other countries where it finds a ready market. The fruit is sold principally through co-operative organizations of fruit farmers.

Where Women Are In Demand

Are Outnumbered By Men In Australia, New Zealand and South Africa

In England there are 1,096 females to every 1,000 males, but the proportion of women in Australia is only 976 per 1,000 men, in New Zealand 957, in South Africa 943, and in Canada as low as 940—that is to say, while 96 per 1,000 women in England must remain spinsters the dominions have large numbers of marriageable men doomed to bachelorhood. In Australia the ill-fated bachelors, according to the latest figures, number about 90,000, in New Zealand 27,000, in South Africa 44,000 (these are whites only), and in Canada 270,000—a total of 431,000 overseas men who must either marry wives outside the dominions or not marry at all.

Too Many Books

Far too many books are published and the majority of them are of the most ephemeral interest and are forgotten within a few months of their appearance. The world would be just as well off if nine-tenths of the books now issued never saw the light of day. And yet once a book attains the dignity of print it achieves a sort of immortality, no matter how poor it is.—London Daily Mail.

A Libelous Word

A Pennsylvania court has decided that when one calls another "przetarmaczyl" he libels him. It seems that the word means "stealer" or "squanderer," but one need not know that to feel sure that the epithet is libelous. It has the look of a scandalous insult.—Youth's Companion.

The first power looms in the world for making carpets were set up at Lowell, Mass., in 1829.

Many a man who thinks
he married a splendid pal, finds
himself tied to a housekeeper

Your husband would rather compliment you on your good-fellowship than sympathize with you over a backache. Stay young by lessening your household worries. For your family's meals, buy only the best, easiest-cooked foods, tender meats—that are wholesome and tasty, quickly-prepared breakfast cereals, good labor-saving washing compounds—these are a few of the things that lessen household drudgery and tend to make the family healthy, wealthy and happy.

Crowd of 200 Entertained in Parish Hall

"Ladies night" at the Men's Club on Monday was a social treat, enjoyed by some 200 persons, including members of Kilgarr Men's Club. Under direction of A. C. Brand a splendid program, commencing with a court whist tournament, was carried out. Prize winners at cards were Mrs. H. McNeill and M. J. Switzer, with Mrs. Ralston and G. Trussell receiving the consolation. Led by E. A. Barrett, a community sing-song followed, in which a number of the old favorites were given hearty preference.

Solos were sung by Miss Doris Walters and Mr. Pacey of Vancouver, both artists being encored. Mrs. Parton and P. B. Snashall entertained with well-delivered recitations, and Mr. Lund displayed his ability in two pleasing violin solos. A jolly dance dance completed the evening's entertainment, music for which was excellently played by Lloyd Vanetta, piano, Messrs Lund and Owens, violinists, and A. C. Brand, drums. The gathering voted hearty thanks to the Club for the delightful evening.

Expresses Common Opinion of Local Roads

Editor News:

As one of many hundreds motorists who daily have to drive over roads of local municipalities, I feel that an expression of mass opinion of their condition, might, if anything help stir some action. I have heard it repeatedly stated that if we combed this continent from one end to the other it would be hard to find such out-and-out bad roads in such thickly-settled (and long-settled districts) as the Riverside, Huntingdon, Essendene, and Yale roads. This paving agitation just started for Yale road is most timely—about ten years behind the time. If there is anything that would drive our people to the States, it is the generally rotten roads over here, which keep everybody poor and cause illimitable trouble. While there is good gravel within a few miles it looks strange to me that the punk imitation—half earth and half big rocks—is thrown on the roads to cause trouble both winter and summer. Here we people of this section are paying 40 to 50% more than Americans to operate our cars—an extra cost that would soon buy a new car—besides racking our machines to pieces for the privilege of sending our good money over to the States for new parts or for new machines to replace those so quickly worn out. What are we going to do about it?

J. HUGGINS

debate "Is Social Life Necessary to the Human Being" featured a regular meeting of Abbotsford High School Literary Society last Friday. Vera Bedlow and Sidney Swift represented the affirmative for the First Year class and Marjorie Green and Kenneth Plover, right, the negative for the Second Year class. The judges, Miss Stenerson and Mrs. Vincent decided in favor of the negative.

Visitors present were Mrs. Swift, Mr. Pratt, Mrs. Lait, Miss Wilson, Mrs. Hunt and Mr. Hill.

A dance is announced for Friday next in the Bridge Pavilion, Sumas Prairie.

Has Record Potato Crop at Sumas Prairie

C. W. Buckle, who recently purchased 60 acres of Sumas prairie land from F. Fooks, reports a satisfactory potato crop from the acreage, his May Queens averaging 15 tons to the acre. His land lies towards Sumas mountain, adjoining the Starr and Cate farms, and he is acquiring more land, with the intention of cultivating at least 100 acres to potatoes next year, several varieties of which he will specialize as seed.

A large warehouse has just been erected by Mr. Buckle, 130 by 40 feet in dimensions, with frost-proof walls—three walls with air spaces between, a total thickness of 14 inches. A washer and grader is also being installed; this machine is in the form of a long table, and the potatoes, carried along on belts, are first washed, then dried, graded, and sacked.

Mr. Buckle operates under the name of "Apex Seed Potato Farm," some of his favored varieties being Early Rose, Burbanks, Early Burbanks, Early Epicure and Nettle Gems, a total of 20 carloads of these certified seed varieties being available this year. Mr. Buckle also has a farm at Brighouse.

Shows Something For Two Year's Work

J. W. Porritt, one of the comparatively recent settlers on Sumas Prairie, is making a stout struggle to survive conditions in prospect because of the drying charges. Mr. Porritt's acreage comprises a fraction under 40, and is part of the old Yarwood farm, situated near the corner of the new Sumas road, and adjoining the Smith, M. Padden, and Lewis & Blair lands. Arriving from southern Alberta about two years ago, and with limited means, Mr. Porritt has since erected a cluster of farm buildings, including a well-built two storey house, large barn, and poultry houses, cultivated a substantial area of his farm to oats and other fodder, laid out an attractive garden, fenced and made innumerable other improvements. Occasional assistance of Mr. Bassani, a nearby Italian neighbor, was obtained to place the larger barn timbers, everything else being done by Mr. Porritt. The house has several built-in conveniences usual to city dwellings, all made by the owner, even to the paneled outside doors. Mrs. Porritt, has of course, performed her woman's share of this pioneer farm work, and soon the two young sons of the family will be old enough to take a real share in the family work.

The Utah-Idaho Sugar Company has announced a bonus of 38 cents per ton to beet growers who shipped to the Bellingham factory. In addition to which the company has increased its minimum guarantee to \$7.00 per ton instead of \$6.00, at the same time asking growers to increase their total acreage to 4,000 to supply the Bellingham refinery.

To The Land of the "Midnight Sun"

Tourist traffic throughout the world has grown to such proportions that it is recognized as one of the greatest revenue producers in the world. And luxurious methods of travel have gone on apace. Bearing this out to a marked degree, was the Norwegian Cruise conducted this summer by the British and Continental Touring Club of London, which had under charter for the better part of a month, the Canadian Pacific liner Montroyal. When this private cruise through the fjords of Norway was organized, the directors of the Club sought for a mode of travel whereby their members could travel in the utmost luxury and independence. To this end the Montroyal was taken from her regular transatlantic run, and placed at the disposal of the British club. Sailing from Immingham, the Montroyal headed through the grey waters of the North Sea to Molde, the first stopping point in Norway. Merok, Svartisen, Hellesylt and Bergen were among the many picturesque Norwegian ports, situated on the beautiful Norwegian fjords for which Norway is famous. The photograph shows the Montroyal anchored in the quiet waters off Molde while the party were paying a short visit.

LOWER LIGHTING RATES

New domestic lighting rates will go into effect for all meter readings on and after November 1, 1926, in the Fraser Valley, north and south of the Fraser River, in Delta and in West Vancouver as follows:

7 Cents net a kilowatt hour for the first 3 kilowatt hours per 100 square feet of floor area; 3 Cents net a kilowatt hour for all additional.

NO METER RENT MONTHLY MINIMUM CHARGE \$1.00

The effect of this new rate is to drop the cost of current to 3 cents a kilowatt hour as soon as the normal amount for lighting is used in homes of any size.

A similar reduction will be made in the commercial lighting rates, details of which will appear in our next advertisement.

W. DUARK

F. FOSTER

FIFTEEN YEARS AGO

(Reprinted from "Post" files of closely this date Year 1911).

Born—To Mr. and Mrs. Dwight, on the 30th, a daughter.

Mrs. Alex. McCallum, Jr. returned home on Monday evening, receiving a royal welcome from her friends.

Les. Murray has purchased five acres and H. Alanson 10 acres of land.

It is reported that the Kilgord Clay Company have struck a 3-foot-six seam of coal on their property.

Phil. McDonald, former proprietor of the Huntingdon Hotel, was killed near Cloverdale by a B.C.E. train on Saturday last.

Mr. and Mrs. A. Trethewey entertained the junior football club at a Halloween party on Tuesday evening.

Mr. Kennedy, who lives near our town, had the misfortune of tipping over of his home when the foundation gave away on one side. He was excavating for a cellar when the accident occurred.

Mr. Walter Wells has decided to build another house on his lots.

Mrs. D. Fraser and Mrs. J. L. Campbell attended the B. C. provincial Sunday school convention last week.

Mr. W. Baker's fine residence is nearing completion.

Mr. H. Hooper has purchased half and acre for a homesite right in town. All lots on the Newsome addition to the townsite have been sold.

Many Ducks Shot First Day

Bird hunters who dared the Friday superstition and got out in the fields, bush or sloughs early the first day of hunting season were well rewarded for their efforts. Very few of those who went gunning on the 15th but returned with something for the family table—and there were many who bagged their limit of ducks on Sumas flats within the first few hours shooting.

Hunters started to arrive from the city—and some from across the border—early Thursday. The harder of these fellows camped that night right on the shooting grounds, ridges of Sumas flats glowing all night with camp-fires. Choice spots on Matsqui prairie, along the Fraser, and at Boundary and Parker lakes were occupied before dawn, when the bombardment began. The weather was favorable for good flight shooting, and it was not long before some of the nimble birds found it best to quit, having obtained the limit of 20 ducks.

Pheasants were found to "be there" for the industrious hunter with a good dog, and many of the beautiful plumaged birds were bagged early in the day. Shooting over the week-end was comparatively poor, Saturday's wind-storm apparently having driven the water-fowl down to the sheltered places and across the river. The pheasants were also lying low, or else had departed to higher and safer territory, for very few were brought in, although all the accessible "beats" were thoroughly gone over by numerous hunters and dogs.

American Fined \$50 for Hunting Without a Guide

E. Kirkman of Bellingham was fined \$50 and \$2.50 costs in Chilliwack police court last Friday for breach of an amendment to the Game Act, which stipulates that a "guide" must accompany Americans who hunt game birds on Canadian soil. H. Eldridge, Bellingham postmaster, was in company with Mr. Kirkman, when he was arrested by Constable Stewart near the Ridge on Sumas flats last Friday. As they claimed to have received advice in this matter from B. C. Police previous to their hunt, both men are very indignant at what they consider an injustice.

Hunting Season Brings Crop of Arrests

Constables Broughton and Stewart of the B.C. Police intercepted and searched 62 automobiles driven by sportsmen, at Evan-Thomas corner on Sunday. As a result Dr. Mullinger, Bellingham dentist, will appear in the local police court this week to answer a charge of shooting a fur-bearing animal out of season. Dr. Mullinger had a red fox in his car, which he stated he shot on Sumas Prairie.

Another caught infringing the B.C. game law was Ernest Coley of Abbotsford, who was found with a grouse in his possession.

Four Vancouver men were arrested for hunting over the newly established bird sanctuary lying between McGillivray Creek and Fraser River, and will appear in Chilliwack police court this week. When questioned by Constables Broughton and Stewart, they claimed to be ignorant of the restricted area. About 40 birds were in their possession.

Matsqui Game Association Has Large Membership

Matsqui Game Protective Association now comprises a membership of practically 100 per cent of land owners in the dyked area, at least 150 active members participating in the organization. This strong membership has been obtained by the adoption of regulations broad enough to meet the requirements of practically all property-owners. For instance, a land-owner who does not hunt himself pays no membership fee, but if he intends to shoot on any place other than his own, he pays a membership fee of 50 cents annually. On the other hand, non-resident hunters—persons not resident in the locality—must pay \$2.00 per year membership. These fees are calculated to equitably meet the cost and labor of issuing permits and keeping the organization functioning.

Five game wardens are "on the job" throughout the area; they are: Alec. Houghton, Bert Farr, Claude Farr, Dr. Wood and H. Shogren.

No trouble has developed through trespassers so far, in the Sumas Game Protective Association area. Game wardens in that district are: W. G. Fadden, L. Lamson, A. Munro, Ira Serl, A. H. Harrop, W. Crossley, J. Watson, W. D. Fraser and W. J. Fraser.

Mrs. Lester (Goldie) Smith was fined \$500 and costs by Magistrate Winslow in Abbotsford police court last week on a liquor-selling conviction.

Katana, local Japanese, was fined \$5 and costs last week for failure to take out a license for his dog.

Six valuable prizes, three for ladies and three for gentlemen, are being offered to guests at the annual armistice celebration and dance, announced for Thursday, Nov. 11. Wood's special orchestra is to provide the syncopation, and other arrangements assure all present of a jolly time. The big problem just at present in feminine circles is "what shall I wear?" Unless married most of the men, as usual will leave selection of a costume to the last moment.

The sale of Beer by the glass Vindicated

THE Government Control of beer sales to the people of British Columbia in licensed premises has been vindicated by the orderly manner in which these premises are conducted.

These quiet and comfortable establishments prove that the open and above-board sale of pure beer has in great measure ended the evils attending the illicit sale of strong drink. They have proved that the self respect and good behavior of the people of British Columbia are more to be depended on than the opinions of those who wish to prevent the people from having any beer at all.

You may find ADULT MEN enjoying a healthful and invigorating glass of beer in the quiet and ease that the well-to-do have in their clubs. Licensed premises in the colder winter months are more than ever the working man's club, where he finds the company and comfort that is his right.

The supervision and regulation of licensed premises by the Government is a guarantee that the excellent conditions under which beer is sold shall continue. Efficient Government Inspectors see not only that such licensed premises are operated in a strictly sanitary manner. They look for a high standard of conduct.

The purity and wholesomeness of all beers served—supplied by the Amalgamated Breweries of British Columbia—is guaranteed by the frequent and strict analyses to which they are subjected by the Government. In the present administration of Beer Parlors the interests of the public are completely protected.

Amalgamated Breweries of British Columbia, in which are associated Vancouver Breweries Ltd., Rainier Brewing Co. of Canada Ltd., Westminster Brewery Ltd., Silver Spring Brewery Ltd., Victoria Phoenix Brewing Co. Ltd.

Now to Get Ready For Winter

Fortify your body and health against the seasonal weather changes now due. The fall with its damp days and cool nights cause bodily changes which require that the blood be in good condition to maintain health and freedom from colds—which often last for weeks. Call on your druggist and get a bottle or two of tonic so that you may weather the winter with bodily comfort.

WORLD HAPPENINGS BRIEFLY TOLD

The Federated Malay States have given \$10,000,000 towards the cost of the naval base at Singapore.

The up-to-date successor of the horse thief has been discovered with a report made by a New York aviator that his plane was stolen while he was at dinner.

The British Government have appropriated \$1,000,000 for publicity in connection with the British Industries Fair in London and Birmingham from February 21 to March 4 next.

Mrs. Clara Von Kazdipolyan, Gyrokok, Rumania, celebrated her 120th birthday by taking her great, great, great grandchild for its first walk, and baking six pies.

Germany and Sweden have agreed to abolish passport visas beginning Oct. 1. Similar abolitions between Germany and Luxembourg and Portugal became effective Sept. 1.

A cable from Paris announces the appointment of Dr. Paul Garneau, of Quebec, to the post of foreign assistant in the service of Dr. A. Gosset, one of the most prominent surgeons in France.

"Our Lady of the Air" has been consecrated as the patron saint of the aviators of Portugal. It is a beautiful image of the Virgin Mary, with arms uplifted toward Heaven, and it stands in a tiny chapel erected for it in the Cintra aviation camp.

Special dispatches say two men, Samuel Melgareo and Joaquin De Silva, have been summarily court-martialed and executed at Tinguindin, in the state of Michoacan, on charges of seditious propaganda in connection with the religious question.

The Soviet has appointed a special commission to formulate laws and regulations dealing with opium, for the purpose of investing the state with complete control of the manufacture, import and distribution of it and its derivatives.

The Queen of Rumania will be one of the least pretentious passengers when she sails to the United States, members of her suite declared, denying reports circulated that she had refused to accept passage on a steamer that would not give her the royal suite or cabin.

In the presence of air attaches of the great powers of the world, a gigantic new hydroplane with five motors generating 2,100 horsepower made its maiden flight in France. With a load of 11,000 pounds, the plane attained a speed of 90 miles an hour. It takes to the air from the water in 50 seconds.

Britain Buys From Canada

Increase in Exports to United Kingdom as Shown

An increase of \$107,554,865 in the value of Canadian domestic goods exported to Great Britain during the twelve months ended July 31, last, as compared with the preceding twelve months' period, is shown in the trade summaries issued through the Dominion bureau of statistics. Exports of Canadian produce to Great Britain during the twelve months that ended at the date reached a total valuation of \$512,064,822, while for the corresponding period of 1925 they amounted to \$404,509,957.

Imports from the United Kingdom during the twelve months under review were valued at \$163,349,513 as against \$154,457,625 in the twelve months that ended July 31, 1925.

Nothing Impossible

Sam was an old southern darkey whose amiability would never permit him to acknowledge a thing could not be done, even though he was utterly at a loss as to procedure. He was called by a tenant in the flat where he was janitor to examine a leaky pipe. "Now, I could find that leak," he said, scratching a bewildered head, then added in a burst of inspiration, "ef I could jest locate it."—Indianapolis News.

Honey Industry Growing

Considerable progress has been made in bee culture in the western provinces during recent years. One beekeeper in Alberta produced more honey during 1925 than was produced by the entire province in 1924. In Manitoba the honey crop trebled in three years, and in Saskatchewan the reported crop of 1924 was over sixty-six times as large as that of 1918.

Sending Reindeer To Seattle

For Christmas advertising in the United States, 225 live reindeer were loaded on the S.S. W. M. Tupper, at Bethel, on the Kuskokwim River of Alaska. More than 1,000 reindeer carcasses and canned, smoked and pickled fish will be taken to Seattle by the Tupper.

W. N. U. 1647

The Cape Frock An Established Vogue

The cape has become a part of every phase of the mode, and is nowhere more smart than when used on the street frock, as pictured in this model of navy, trimmed with polka-dotted silk. The cape is separate, but so flattering you will never want to take it off. It has a long tie collar, or the ends crossed, one at the back and one at the front. The frock underneath is straight, with a tailored collar ending in long revers, and a set-in panel. The tight sleeves are set-in at the armhole, and a wide belt is crushed into a big buckle. No. 1299 is for the miss and small woman, and is in sizes 16, 18 and 20 years. Size 18 years (36 bust) requires 3 1/2 yards 54-inch plain material, and 1 1/2 yards 54-inch plain material, and 1 1/2 yards 54-inch figured. Price 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

Radio Stations Protest

Says Canadian Wave Lengths Pre-empted By U. S. Stations

Radio stations in the United States are pre-empting Canadian wave lengths and thereby preventing the opening of more Canadian stations.

This charge was made at a meeting of the National Association of Broadcasters held in New York by A. R. McEwan, radio director of the Canadian National Railways.

World's Largest Cable Landed

The world's largest cable, 3,400 nautical miles in length, capable of handling 2,500 words a minute between the United States and England, has been landed at New York. The cable was brought ashore by the largest cable ship in the world, the Colonia, for the Western Union Telegraph and Cable Company, completing a three months' task.

Too Late

Sophia, aged eight, to grandpa: "Grandpa—"

Grandpa (severely): "Little girls should listen and not talk."

At the end of the dinner Grandpa, in a gentler mood, calls the child and asks: "What was it you wanted, dear?"

"Too late, Grandpa; there was a fly in the salad, and you ate it."

Big Steam Plant

Announcement is made that the East Kootenay Power Company will spend \$1,000,000 in the construction of a steam plant on the Alberta side of the Alberta-British Columbia boundary at Crow's Nest. The work will be started this fall. The plant will utilize coal from the adjacent mines in the Crow's Nest Pass.

The only thing that some people learn from experience is what fools they have been.

Take Drastic Measures

United States Mail Clerks Get Orders To Shoot To Kill

"Shoot to kill" orders have been issued to 22,500 railway mail clerks as a drastic means of protecting the precious postal treasure from bandits the United States post office department has announced.

If this method of defensive warfare against the underworld proves inadequate, post office department authorities indicated the United States Marines might be called in again to guard the mails, as they did in 1921.

The command not only applies to railway mail clerks, but to all postal employees, and is intended as a warning to bandits who make a business of robbing mail trains. The order instructs all employees to defend mail property even at the expense of their own lives.

The recent Chicago hold-up, when \$135,000 in currency was stolen, is said to have inspired the order. Postmaster-General New issued the command after a sudden conference with postal experts.

Holland Made Tulip Popular

Government Had to Stop Boom For Bulb Growing

The tulip, called by the Turks the turban flower, was brought to England from Vienna in the later years of the reign of Queen Elizabeth. If Holland cannot claim it is a native, there is no doubt that the Dutch contributed in large measure to its popularity. During the tulip mania of the 17th century bulbs in Holland were worth their weight in gold, and in 1639, 120 specimens were sold for 90,000 florins. Finally the government had to intervene to stop the boom, for bulb growing was beginning to hamper agriculture.

Goes Back To Potsdam

German Anti-Republicans Glad to Have Former Crown Prince

Former Crown Prince Friedrich Wilhelm has arrived at Potsdam, the favorite residence of his ancestor, Frederick the Great, and now a fortress of the German anti-Republicans who are delighted to have a Hohenzollern there again.

The former crown prince, who hitherto has been living the life of a country squire in his castle at Oels, which may be taken away from him as a result of the government's measures in connection with the former German prince's property, says he intends to live a "quiet, secluded life."

More Appropriate

"In your sermon you spoke of a baby as a new wave on the ocean of life," remarked Mr. Younghusband. "Quite so," replied the clergyman. "A poetical figure of speech." "Don't you think," suggested the harassed member of his flock, "that a fresh squall would hit the mark better?"

When a single girl asks a single man if he snores, the plot begins to thicken.

A Little Miss and a Big Man

Though her proximity to a life belt might seem to indicate certain fears of the broad bosom of the Atlantic on the part of Miss Mary Ferguson Lawson, aged 5, of Winnipeg, you would be wrong in supposing it, since the young lady has merely taken up this position for purposes of photography.

Like many more experienced travelers, Miss Lawson chose the Canadian Pacific liner Empress of Scotland—with which, of course, are included her commander, R. G. Latta, and her purser, J. Walker Bartlett (the tall man)—as the most satisfactory means of trans-Atlantic locomotion for a young and unaccompanied voyager. For all three, the ship the skipper and the purser, have seen most of the great ports of the world, as well as many of its out-of-the-way corners on numerous cruises, and have traversed the Atlantic many a time.

Mary was born in Winnipeg, but lived with her mother in England. Now her mother is dead and she is going to live with an uncle, R. W. Ferguson, at Woodstock, Ont.

Want British Films

Six Princes Associated in Plan To Break U. S. Motion Picture Monopoly in India

Six Indian princes are associated in a scheme to spend \$4,000,000 in an attempt to break America's motion picture monopoly in India and open a new market for British productions.

The plan is to organize a chain of 300 theatres, showing only English films in the principal cities of India.

The Aga Khan and the Maharajahs of Alwar, Patial, Bikanir, Jaipur and Kashmir are donating funds to the movement, but declare they are not interested in the profits.

Hungarian Peasants Sell Children

Sale of children by Hungarian peasants is said to be so common, due to the terrible plight of the peasantry, that regular market prices exist. The maximum price of £3 is paid for children of from thirteen to fifteen years. The buyers are farmers looking for cheap, unprotected labor.

Early Golfer: Notice any improvement since last year?

Caddie: Had your clubs shined up, haven't you?

An Expert at the Game

"Billy Reith, famous British pro, and his wife, who have come to Canada to make their home here. They were photographed on board the Cunard liner Alaunia just before she docked at Montreal last Monday. Mr. Reith has been pro at the Eltham Golf Club, Eltham, Kent, for nearly 35 years, and is an expert in every phase of the game.

Care of the Tooth-Brush

That we should sterilize our tooth-brushes is the advice communicated to Clinical Medicine (Chicago) by E. J. Hay, of Garrison, New Mexico. The newspapers and magazines, he writes, are all advising people to brush their teeth from one to six times a day. Some advise vigorous brushing even to the point of causing slight hemorrhage; others are of the opinion that none of the advice is correct. The fact that the brush is sterilized before use.

Tooth-brushes upon the walls of dressers or in the soap dish, except in a sealed package, are in these places dirt, dust and brush should be night and shoe using; moreover, used so vigorously of the gun always swarms waiting for a victim in the brush.

Pyorrhea is becoming more frequent, and I believe that many cases are due to the too-vigorous use of a non-sterilized brush. We must be very explicit in telling our patients and the public how to take care of themselves in this regard, going into full details as to how they are to sterilize and use their tooth-brushes. Take nothing for granted, but assure yourself that there is no possibility of your directions being misunderstood.

Manitoba Grown Hemp

Numerous Articles Now Manufactured From Local Products

A striking display of the products to be at Toronto recently when Harris Turner and his son are on display in the Canadian colonization offices on Main street. This exhibit, put up by the L. R. Keys Fibre Mills, consists of green hemp straw, fibre flax grown at the M.A.C. Russian hemp and sweet clover straw. Samples also of dew and water-rotted hemp and green flax and upholstering tow are on show. The different types of cord, running from flax rope made from flax straw, through hempen clothes lines, garden lines, binder twines and smaller cords, as well as roofing felts, oakum and flax felts, are a few of the products which are exhibited.—Free Press.

English Nurse Is Plucky

Nearest Neighbor in Central Africa Five Days' Walk Distant

To the leper colony in Central Africa an attractive young lady has gone from her home at Penn, Staffordshire, taking with her a stock of new "Moorgal" serum, which is believed to effect a cure of the dread disease. She is a medical missionary, whose headquarters are at Zomba, on Lake Nyassa. She is the only nurse in a radius of 60 miles, and her nearest neighbor is five days' walk distant. "Leopards and lions walk around the house at night," she states, "but I am not afraid, because there are skilled hunters to deal with them." Just before she left to visit England eight man-eating lions killed 30 villagers, but they were all eventually trapped.

Terror As a Check

As long as there are persons who hold that a murder trial is a mere battle of wits, instead of a stern process of justice, it must be expected that sentences of surprising leniency in proportion to the crime will sometimes be imposed. Not until murder becomes so prevalent that people are thoroughly frightened will they regard gangsters as dangerous public enemies, who must be put where they can do no more harm. This point of terror appears to be rapidly approaching.—New York Herald Tribune.

Cement Production Shows Increase

A statement issued by the Dominion bureau of statistics at Ottawa states that the value of cement products made in Canada during 1925 amounted to \$2,020,239, an increase of 61 per cent. over the \$1,257,871 produced in the previous year and 34 per cent. over the \$1,505,528 reported for 1923.

Plants making cement products such as bricks, building blocks, pipe, artificial stone, etc., represented a capital investment of \$2,594,736.

Keep Animals On Roof

A Lima shoe dealer was killed recently when a cow fell through the roof of his house into the dining room. Animals often are kept on top of houses in Peru, and it frequently happens that a cow passes her whole life on a roof, being taken there as a calf and finally brought down as fresh beef.

The population of the earth doubles itself in 250 years.

A man never grows when he gets the lion's share.

The Value Of a Farmer

By Chas. W. Peterson

There is no subject which should interest the smaller towns all over Canada than the development of their rural trading areas to the greatest possible extent. A study of the value to Canada of a farmer is illuminating. It is shown that over 163 million dollars are produced in this country in immigrants. This is its important part of the country's wealth. Fisher calculates the value of the average farmer as \$3,000. The value of a farmer is a money value increasing to \$3,000. The value of a farmer is a money value increasing to \$3,000. The value of a farmer is a money value increasing to \$3,000.

worth at least 25 cents, with a large package of JIF for 25 cents

SEE OUR WINDOW

ALBERT LEE

BAKER AND GENERAL MERCH

oats, barley, flax) coal, and in and out-going passenger revenue, and divided the number of settlers into the figures given. Employing statistics of the Dominion railway commission, the exact percentages of each of the railways were worked out, based on the total grain tonnage for the year between 1st of September, 1915, and the 31st August, 1916. Total for the three prairie provinces alone for the four classes of revenue above referred to was \$163,516,318. In 1916 there were 219,105 farmers in those provinces and the division of one total by the other places the settler's value at \$746.33. Assuming, therefore, that all traffic should be credited to the settler, that sum is the average amount each farmer put into the revenue of the railroad. \$746.33 capitalized at 5 1/2 per cent., being interest government is paying on its Victory Bonds, gives a return of \$13,569.63—the value of each average farmer to Canada.

If we capitalize that portion of the national income which is ascribable to human effort it is found to be from six to eight times all property value. The total amount of life insurance in force is only a fraction of this capitalized value. We may, therefore, readily come to the conclusion that Canada's "vital" asset is easily over-greatest. If so, it seems to follow that reasonable public expenditure devoted to the task of adding to this asset by intelligently promoting immigration to this country, must be regarded as an excellent national business investment. The immediate beneficiary is the small town.

Chicken Shooting Banned

Order-in-Council is Passed by Manitoba Government

Prairie chicken throughout Manitoba will enjoy a further lease of immunity from hostile snipers, as result of an order-in-council passed recently by the provincial government. The season has been declared closed in respect of prairie chicken, partridge and any grouse throughout the province, making the second year in succession this inhibition has been imposed upon shooters, and hopes are voiced in governmental circles that the results will justify the action. The open season for duck shooting will continue until Nov. 30. The quota per gun is 20 a day from Sept. 15 until Oct. 1, and thereafter 40 a day until the open season closes.—Free Press.

Had Best of Argument

A story is told concerning Father Bernard Vaughan when he was touring in America. A boastful American at St. Louis said to him one day, "Look at our Mississippi and Hudson Rivers. Why, in comparison with them your Mersey and Severn and Thames are sleepy, sickly streams."

"Oh," said Father Vaughan, "I think yours are just as sickly as ours." "How do you make that out?" inquired the American. "Well, they are all confined to their beds," replied Father Vaughan.

Rations For Elephants

Tame elephants, many of which are beasts of burden in the Orient, eat an enormous quantity of food. A full grown elephant in domesticity will eat on an average a thousand pounds of green fodder and not less than 25 pounds of unhusked rice daily. The problem of properly feeding a tame elephant is a big one.

Still Applies To Some

Many a person who is a small eater has feelingly been described as having "a bird's appetite." How inaccurate this designation is may be gleaned when one learns that many birds eat several times their own weight each day.

Opportunity knocks but once, but your tried and true friends knock at the time.

When Your Meat Reaches the Home

Have the juices soaked through the wrapper—is the meat tainted by odors and stuck with pieces of ugly paper? Or is your meat kept in perfect condition by Ajax or Hercules wraps?

Either kind is wax-coated to guard the flavor of the meat. Either kind does away with the expense and bother of an inside waxed sheet.

Butchers should write us for samples and prices.

Strange, Romantic Love Adventures of the Flapper you know!

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

CHAPTER XIV.—(Continued).

Joanna's reply was eagerly grateful. "Yes. That is what I tried to say. I want to be able to do as I please and not be criticized."

Yvonne rose, and crushed the fire from her cigarette. "That's all the talk we shall need, I think," she said. "We shall enjoy each other tremendously, I imagine. Shall we go down to the winter garden? There will be somebody besides Teddy Dorminster still there."

Joanna was conscious of something having been said, of some confidence reached out to her by Yvonne, which she had not fully understood. She was puzzled, as if she had been confronted by some subtle challenge that masked a strategy. For an instant she was at the point of breaking away, of running away regardless of the two trunks, a shining new one and a shabby old one, which had been lifted down from her taxi cab. This impulse subsided immediately, however. She decided that after a while she would understand Yvonne, perfectly.

And after awhile, a long time after, Joanna did!

In the winter garden the group that Yvonne had left around the stone table had broken up. Only Teddy Dorminster and two others remained. One of these was a swarthy, dark haired, dark eyed man, who might have been of any age between twenty-five to forty-five. He was presented by Yvonne as Pendleton. Joanna thought him a very grave, and unaffable person. The other besides Dorminster, was a woman, who was easily more than twenty-five but could not possibly have been forty. Yvonne identified her as Mrs. Marks. "Jove!" Lord Teddy exclaimed when Yvonne had named Pendleton and Mrs. Marks for Joanna. "I've thought of something clever!"

"Think it over carefully, Teddy," Yvonne admonished him, "before you reveal it. You're so often mistaken."

"But this is excellent," the irrepressible Lord Teddy insisted. "Positively ripping. Pendleton, here, and Doris, Doris Marks—don't you see?"

"Only that both are of a mind that alcohol is better than tea, and that you agree," Yvonne informed him. "And also that the tea I have poured for Miss Manners is awaiting to be passed!"

"A thousand pardons, Miss Manners—by the way, is it quite all right for me to repeat now what I let George say from me a few minutes ago? About your being a devilish pretty girl, you know? I was telling Pen here—Ah, that clever thing I thought of. I must tell you what it was before I forget it!"

"One thing at a time," Yvonne insisted. "What were you telling Pen?"

"That I'd just seen the kind of a

face that no man could ever forget after he'd once held it close to him. Isn't that what I said, Pen old boy?"

"You said absolutely nothing of the sort, or spoke of any face whatever," Pendleton gravely assured him.

"Perhaps I didn't," Teddy admitted. "But I thought it, and meant to say it. So Miss Manners will consider that I did."

Here the woman Yvonne had called Mrs. Marks interjected; "If she sees much of you, Teddy, she probably will have enough to remember of what you actually do say, without being bothered with what you merely think."

"Don't alarm her, please!" Lord Teddy exclaimed. "No woman ever remembers anything I say to her."

"They don't dare, perhaps," Pendleton observed.

"Both you and Doris—" Teddy began, and broke off. "Pendleton and Doris," he said again, "that brings me back to my clever thing. Listen, everyone: Pendleton and Doris Marks; whenever I come upon Pendleton here at Yvonne's I come upon Doris Marks. Penmarks! Isn't that clever? Penmarks! What?"

It was only Lord Teddy himself who laughed, and Joanna wondered why.

CHAPTER XV.

Joanna Holds Her Own

It was not long before Lord Teddy had skilfully manoeuvred Joanna from the stone table in the winter garden into a tete a tete corner of the drawing room. "Never could stand Pendleton, you know," he confided to her when he had held a flame for her cigarette. "Can't see what Doris sees in him, or he in her, for that matter. Can you?"

"Do you know," Lord Teddy observed, moving closer to Joanna, "I'm going to be terribly fond of you before long."

"Is that how it is?" Joanna inquired. "You see everybody's fresh news to me, now. I have to wait for signs."

Lord Teddy eyed her intently. She felt singularly at ease with this exuberant young man. She laughed at him brightly when he protested: "Oh, really, now! You mustn't pretend that I'm dreadfully dumb when a young woman declares that she doesn't know everything! It's never true these days, you know, and it's a lot jollier to not make believe!"

"I'll admit," she agreed, "that anything I don't know hurts. I've tried not to miss anything, but I have, a lot. So there's still a chance for you to do a bit of teaching. You may start with Mr. Pendleton and—was it Mrs. or Miss Marks. What was wrong about your Penmarks?"

"Do you know," he observed, mov-

ing from his chair to a place closer to her on the divan into which she had settled, "I'm going to be terribly fond of you before long."

"Yes, I'm sure of that," she informed him. "I can see the signs. Any how, teachers always are, aren't they? But you were saying?"

"About Penmarks? It's 'Mrs. Marks, of course. You'll probably see the other part of her tomorrow night? You'll be here, won't you?"

"I'll probably be here, but I don't know what's happening. Is it whatever you thought a while ago I might be coming to sing or dance for? I must find out yet what you think specially about singers and dancers."

"Yvonne's giving something or other; usual thing. Doris will be on deck with her husband; he's not a bad sort, but a bit empty. She and Pen will be miserable trying to keep up appearances. It's beastly, of course, for anybody to have husbands and wives about, but these two moon about it so openly they're delightful."

"Is he—married, too?"

"Profoundly! He has to be more surreptitious than any husband I know. You'll be fearfully amused by the two of them, Pen and Doris, when you're used to them. They're always about some place for tea. That's why I really was clever, you know!"

"And it doesn't make any difference—to anybody? To their friends, like Miss Coutant, and people who know of the husband and wife?"

Lord Teddy examined the girl beside him deliberately. He noted all the distinguishing patterns of her. His eyes dwelt particularly for an instant that barely could have been measured, on a smartly silken knee, hardly yet escaped from the angular sharpness that is youth—but threatening to come out altogether from within the confines of a modestly meager dress. His glance, sweeping upward in its lightning appraisals, hovered joyously upon her mouth, that was almost round because of the full, scarlet curving of the lower lip and the deep, perfect bow of the upper one—a splash of color as if someone had crushed a red rose there. She knew what he was doing. She felt his eyes wherever they rested. Not a muscle of her twitched, but she was conscious of an exquisite thrill of satisfaction with herself. The knee had never before, upon such an occasion—and why were shirts worn short and lips shaped like round rose buds, and a gown fashioned so carefully, if not for open consideration?—the knee had never been so beautifully sheathed in a silk so perfect, and the lips never so deftly toned and balanced.

(To be continued)

Use Your Best Manners

North Wales Being Courteous to Everyday Companions

"Manners," it has been said, "are not like clothes; it is a bad thing to have two suits of them—one for best and one for every day. Wear your best manners all the time; they suffer more from being put away than by constant use. If you keep your best manners for company, they will fit you badly, and your visitor will suspect they were put on for him. Wear your second-best clothes at home if you will, but not your second-best manners. To whom is it worth while to be courteous, if not to the people you love best?"

Rub it in for Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Was Related To "Robinson Crusoe." William Gillies, last living descendant of Alexander Selkirk, the original of Defoe's Robinson Crusoe, died at Largo, Fifeshire.

Selkirk, put off his ship at Juan Fernandez, off the coast of Valparaiso, after a dispute with his captain, lived alone on the island for over four years before being picked up. He was born at Largo, where his descendant died, 250 years ago.

The Polite Way

The class had been instructed to write essays on "Oliver Twist," and one little girl had written, "In the kitchen stood a statue of a policeman."

"Surely that's wrong," said the teacher.

"No, miss," said the little girl, "the book says 'a stone copper,' but I thought that was a more polite way of putting it."

A Relief

It must be a relief to an engineer who has driven his wife all around the country in the flivver on his day off to climb into his nice locomotive the next morning and run it all by himself.—Philadelphia Inquirer.

Many Millionaires

Stated That 11,000 People Are in Millionaire Class in U.S.

There are 11,000 millionaires in the United States today, it is estimated by Joseph S. McCoy, government actuary, United States treasury, in an article in the current American Bankers Association Journal, which points out that this means that one person out of every 10,450 Americans has accumulated a fortune of a \$1,000,000. Mr. McCoy declares that the nation now has its first billionaire. The article says:

"Latest preliminary figures by the bureau of internal revenue indicate that for 1924 seventy-four individuals made returns for income tax whose net income was acknowledged to be in excess of \$1,000,000. This means their entire income, less all allowable deductions. The total net income of these seventy-four was returned at \$154,852,703, and average of something over \$2,000,000 each. Thirty-six had incomes net in excess of \$1,500,000. Incomes in excess of this amount, but not in excess of \$2,000,000, numbered thirteen. Incomes over \$2,000,000, but not over \$3,000,000, were fifteen. There were four incomes between \$3,000,000 and \$4,000,000, three with between \$4,000,000 and \$5,000,000, while three individuals returned incomes in excess of \$5,000,000. These three returned average of over \$9,318,000."

Husband In the Kitchen

Men Appear to be Becoming More Skilled in the Culinary Art

As kitchen helpers in the World War, a multitude of American men became familiar with culinary tasks. Multitudes of other men who tinkered in their garages with cars of the cheaper makes say they feel quite at home with the cans, pans and skillet grease of the kitchen. When father takes the family touring, he builds the fire and often broils the stake and fries the potatoes, and he seems happy in his sketchy attempts to clean the frying pan afterward. Hunting and fishing are he-man jobs, and their devotees do their own cooking and bring their experiences back to the home fireside.—Cincinnati Times-Star.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

The United States has an option or lease on the Nicaragua Canal route which will not expire for nearly a century.

Cariboo Highway Now Opened

Telegraph Line Has Been in This Country Since 1866

The new Cariboo highway has at last been open to traffic, adding the final link in the communication of that secluded region with the outside world.

Since 1866 the Cariboo has been connected with the rest of the world by telegraph, ever since the Americans abandoned at Telegraph Creek their projected line to Russia.

The reason for such an undertaking was the desire to connect America with Europe—by telegraph. The snapping of the first British cable across the Atlantic led to suspicion that a submarine telegraph was not feasible and the construction of a line to Siberia, routed by the Cariboo, was undertaken and completed as far as Telegraph Creek. At this point word was received of the successful laying on the second attempt of a cable across the Atlantic.

Proud of Being Nuisances

Many Motorists Use Horn When It Is Unnecessary

There are a lot of drivers who take instant resort to the horn when their progress is impeded. It is an evidence of insanity, but there it is. Some of the tiny boats on the Mississippi would have to stop when they blew the whistle, but these chaffy motorists have to blow their horns whenever they are stopped. One may easily imagine that they are proud of the opportunity of showing what nuisances they are. Anyhow, they go it with a zeal and frenzy that is quite convincing. The horn may be an unnecessary noise, but you can't prove it to these nit wits.—Los Angeles Times.

Fastest Wheel in World

Turbine On Aeroplane Has Speed of 40,000 Revolutions a Minute

The fastest revolving wheel in the world, according to estimates of experts, is the turbine wheel on the special supercharger of the aeroplane used by Lieut. John Macready in his recent attempts to better the world's altitude record. It revolves at the almost inconceivable speed of 40,000 revolutions a minute—almost 700 a second. This is about twenty times the highest speed of an automobile crank shaft.—Popular Science Monthly.

THOUSANDS OF THANKFUL MOTHERS

Strongly Recommend Baby's Own Tablets to Their Friends

Once a mother has used Baby's Own Tablets for her little ones she would use nothing else. The Tablets give such results that the mother has nothing but words of praise for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children, and from my experience I would not be without them. I would urge every other mother of young children to keep a box of the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

Great peace have they which love Thy law.—Ps. cxix, 165.

Dear Lord and God, incline Thine ear unto my call! O grant me that in all, This will of mine May still be one with Thine!

Teach me to answer still, Whatever my lot may be, To all Thou sendest me Of good or ill, All goeth as God will.

—Alice Williams.

The root of all dissatisfaction and discontent with self, and with one's surroundings, and with one's prospects, can never be reached until we go down to the will of God in our soul's birth and soul's mission, and make the discovery of that will for us, and the doing it our chief aim and hope. No change in life's circumstances, no larger work, no happier outlook will be enough. We ourselves need to be born again; it is not our outward life that needs to be refashioned.—Newman Smyth.

"This goes against my grain," laments the thrifty Saskatchewan farmer when paying off his harvest help.

Better a close-mouthed friend than a close-fisted enemy.

An Auburn-Haired Community

Remarkable Condition Exists in Village in Wales

In a certain village in Wales, it is said, there is a greater proportion of copper or auburn-haired people than in any other part of the British Isles. A local medical officer, when asked for an explanation of the definite types which still persisted in the villages of this part of Wales, said he had found even the smallest communities very conservative in their marriage relations, and they rarely went outside their own "clan" to find a partner for life. Another remarkable feature he had noted was the evidence of Spanish blood among many of the women on the coastal villages. He had found the type to persist even after hundreds of years. "In one family I visit," he said, "the parents, whose people have lived in the village all their lives and look Welsh, have daughters who could pass anywhere as Spanish girls."

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefleur of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—DAME WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with back-ache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use.

FIVE ROSES FLOUR always in stock
AT THE OLD STAND, ABBOTSFORD

Lower Electricity Rates in Valley Announced by B. C. E. Company

Substantial reductions in lighting
rates, both domestic and commercial,
will be put in effect by the B.C.E.R.
company in Abbotsford, Sumas and
Matsqui district, as other parts of this
valley on November 1. All meter read-
ings on and after that date will be set
at the new rate.

Specifically, the rate for residences
will be seven cents a kilowatt hour for
the first three kilowatt hours per 100
square feet of floor area, and all cur-
rent in addition will be charged at three
cents a kilowatt hour. The minimum
area will be 1,000 square feet. Thus
a house of 1,000 square feet will pay
seven cents a kilowatt hour for the
first 30 kilowatt hours and if it should
use, say, five kilowatt hours more, this
additional current would cost only 15
cents in all. The rate formerly charg-
ed was 11 cents gross with a meter rent
of 15 cents a month.

The new commercial rates carry out
the same principle except that the amount
of current at the 7 cent rate will be
based on the connected load rather than
the floor area of the store. The first
100 kilowatt hours for every kilowatt
of connected load will be at 7 cents.
All additional current will be at 7
cents. For customers with installa-
tions of more than 10 kilowatts, there
will be a discount on this seven cents
of one-half cent for the second 1,000
kilowatt hours; one cent for the third,
and 1 1/2 cents for the fourth 1,000 kilowatt
hours. In this case there also
will be a monthly minimum charge of
\$1 per kilowatt connected.

SYNOPSIS OF

LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed
Crown lands may be pre-empted by
British subjects over 18 years of age,
and by aliens on declaring intention
to become British subjects, condi-
tional upon residence, occupation,
and improvement for agricultural
purposes.

Full information concerning regu-
lations regarding pre-emption is
given in Bulletin No. 1, Land Series,
"How to Pre-empt Land," copies of
which can be obtained free of charge
by addressing the Department of
Lands, Victoria, B.C., or to any Gov-
ernment Agent.

Records will be granted covering
only land suitable for agricultural
purposes, and which is not timber-
land, i.e., carrying over 8,000 board
feet per acre west of the Coast Range
and 8,000 feet per acre east of that
Range.

Applications for pre-emption are
to be addressed to the Land Com-
missioner of the Land Recording Di-
vision, in which the land applied for
is situated, and are made on printed
forms, copies of which can be ob-
tained from the Land Commissioner.

Pre-emption must be occupied for
five years and improvements made
to value of \$10 per acre. Further in-
formation regarding purchase or lease
of Crown lands is given in Bulletin
No. 10, Land Series, "Purchase and
Lease of Crown Lands."

For more detailed information see
the Bulletin "How to Pre-empt
Land."

PURCHASE

Applications are received for pur-
chase of vacant and unreserved
Crown lands, not being timberland,
for agricultural purposes; minimum
price for first-class (arable) land is
\$5 per acre, and second-class (graz-
ing) land \$2.50 per acre. Further in-
formation regarding purchase or lease
of Crown lands is given in Bulletin
No. 10, Land Series, "Purchase and
Lease of Crown Lands."

Mill, factory, or industrial sites on
timber land, not exceeding 40 acres,
may be purchased or leased, the con-
ditions including payment of
stampage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20
acres, may be leased as homesites,
conditional upon a dwelling being
erected in the first year, title being
obtainable after residence and im-
provement conditions are fulfilled
and land has been surveyed.

LEASES

For grazing and industrial pur-
poses areas not exceeding 640 acres
may be leased by one person or a
company.

GRAZING

Under the Grazing Act the Prov-
ince is divided into grazing districts
and the range administered under a
Grazing Commissioner. Annual
grazing permits are issued based on
numbers ranged, priority being given
to established owners. Stock-owners
may form associations for range
management. Free, or partly free,
permits are available for settlers,
campers and travellers, up to ten
head.

A GOOD CORSET

Put Your Troubles in a Bottle

If you've lost your carburetor, and now use a nutmeg grater,
That has caused you lots of trouble and is eating up the gas;
If your radiator's leaking, and your rusty springs are squeaking,
Like the winds that howl and chatter on some barren mountain pass;
If your gears are loose and rattling, like the noisy Peon's battling,
And your wheels make tracks like natives as they tramp along the Nile;
If torn curtains let the breezes chill you till your gizzard freezes;
While your noisy fenders rattle till folks hear them for a mile,
If your nerves are worn and shaking with the toll your trouble's taking
As you try to start the engine in your little old machine;
If your flabberdashed and dizzy, when you try to saddle Lizzy,
Do you mourn like Jonah used to when the gourd lost its green?
Put your troubles in a bottle, drive the cork and close the throttle,
Let us overhaul your jitney and your grief 'll hang high and dry;
I'll set your wheels in motion, like the gentle surging ocean,
And with joy you'll grip the throttle, while the rushing world spins by.

Babies
Like
Pacific
Milk

Mrs. J. W. Milton of Vancouver in a
letter, says she raised her youngest
child from infancy upon Pacific Milk
and it has turned out the healthiest of
three in her family. This letter is
gratefully received for Pacific Milk is
pure and we appreciate such evidence
of its purity.
